

New builds

AF has wide experience within the development, planning and building of commercial property, housing and public buildings.

AF places an emphasis on management, quality, risk assessment and flexibility in all its new construction projects. Our experience is that this is crucial in ensuring a profitable project for customers and for ourselves.

We are able to recommend designs and materials that allow you as a client to be able to think more freely with respect to the possibilities and design of the solutions for your requirements. Construction projects which place high demands on technical and functional solutions are challenges we like. We are known for creating good premises that meet customer needs and requirements.

AF Gruppen ASA is one of Norway's largest exchange-listed construction companies. The company has 2000 employees in Norway and Sweden, and has a turnover of more than NOK 5 billion in 2006.

AF is divided up into five business areas: property, building, construction, environment and energy. Our ambition is to be the natural choice to solve the most demanding tasks, preferably on the outer fringes of what is possible for a construction company. Our conduct is characterised by professionalism and high ethical standards.

Some of our reference projects:

Housing

[Lundekroken](#)

[Sofies Hage](#)

[Årvollskogen](#)
