

Demolition and Recycling

AF is a leading company in the Nordic countries when it comes to removal, demolition, environmental reconstruction and recycling of buildings, industrial plants and offshore installations.

A new and modern machinery, Europe's most modern disposal site; AF Environmental Base Vats, and qualified staff makes it possible for AF to undertake the most complex assignments. AF's environmental activities clean up from the past and prepare for the future. The services are offered through the business units AF Decom and AF Decom Offshore. Both are certified by DNV in accordance with BS EN ISO 9001 / 14001.

AF Gruppen ASA is one of Norway's largest exchange-listed construction companies. The company has 2000 employees in Norway and Sweden, and has a turnover of more than NOK 5 billion in 2006.

AF is divided up into five business areas: property, building, construction, environment and energy. Our ambition is to be the natural choice to solve the most demanding tasks, preferably on the outer fringes of what is possible for a construction company. Our conduct is characterised by professionalism and high ethical standards.
