

Supply to AF

Purchasing is critical to the continued success of AF.

The current total purchase volume for the AF Group is approx NOK 3.5 billion (EUR 400 million) per year. The volume is increasing and we are constantly looking for new suppliers that could help us to become even more competitive on the market.

The purchasing strategy is to coordinate and concentrate purchases, develop existing relationships and to find new suppliers in new markets. We have a clear target to source more from countries outside Scandinavia.

As a supplier, we require you to meet the standards, values and criteria defined by our customers, our policies and the standardisation bodies in the countries we are active. In return, we offer you a possible long term relationship with a reliable, fast growing company.

AF Gruppen ASA is one of Norway's largest exchange-listed construction companies. The company has 2000 employees in Norway and Sweden, and has a turnover of more than NOK 5 billion in 2006.

AF is divided up into five business areas: property, building, construction, environment and energy. Our ambition is to be the natural choice to solve the most demanding tasks, preferably on the outer fringes of what is possible for a construction company. Our conduct is characterised by professionalism and high ethical standards.
