

Property Development

AF Group acquires plots of land that are developed into commercial or residential projects. This is done either by making the investment ourselves or in conjunction with partners. The majority of our projects are located geographically around Oslo and in the central Østland area.

AF identifies properties with development potential and adds value to the properties through a development process. The added value is extracted by selling the property once its development potential has been maximised.

AF Gruppen ASA is one of Norway's largest exchange-listed construction companies. The company has 2000 employees in Norway and Sweden, and has a turnover of more than NOK 5 billion in 2006.

AF is divided up into five business areas: property, building, construction, environment and energy. Our ambition is to be the natural choice to solve the most demanding tasks, preferably on the outer fringes of what is possible for a construction company. Our conduct is characterised by professionalism and high ethical standards.
